HP Hercules Unveils the Singapore Limited Edition — A Tribute to Timeless Craft and Modern Strength

Singapore, xxx November 2025 — HP Hercules proudly presents the *Singapore Limited Edition*, an exclusive series of just **eighteen timepieces** crafted to honor the spirit of refinement and resilience that defines the Lion City.

At the heart of this creation lies an **off-white Grand Feu enamel dial** — a work of patience and precision that embodies the quiet perfection of true craftsmanship. Fired repeatedly at nearly 900°C, the dial achieves a serene, glass-like finish that will never fade with time. Each piece is individually hand-crafted, ensuring subtle variations that make every dial unique.

The enamel's soft, ivory tone reflects Singapore's balance between heritage and modernity — understated yet luminous, sophisticated yet confident. Subtle red accents pay tribute to the nation's vitality and strength, while the case, crafted entirely from **polished tantalum**, embodies HP Hercules' pursuit of enduring substance.

Renowned for its exceptional density, deep grey-blue hue, and resistance to corrosion, tantalum is a rare and demanding material to work with — a symbol of strength refined through challenge. The mirror-polished finish enhances its natural depth, producing a quiet brilliance that perfectly complements the purity of the enamel dial.

Powering the Singapore Edition is the **HP Hercules Hand Wound Double Barrelled Calibre with 120 hours (5 days) power reserve**

Each of the eight pieces is individually numbered and available exclusively through HP Hercules' Singapore partners and collectors' network.

"Singapore represents a harmony between precision, progress, and quiet strength — values that deeply resonate with the HP Hercules philosophy," HP Hercules.

"This edition is both a tribute and a token of appreciation to a city that truly understands the art of refinement."

Hercules
